## **DETAILED ACTION**

### ***Drawings***

1. Figures 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
3. The following title is suggested: --FLUORESCENT LAMP WITH AUXILIARY TUBES--.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2879

5. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Peterson (US 4,569,004).

6. Regarding independent claim 1, Figure 3 of Peterson shows a fluorescent lamp (16) comprising a tubular lamp body (72); auxiliary tubes (74) extending from both side ends of the tubular lamp body; and connection terminals formed inwardly at both side ends of the auxiliary tubes (col. 3, ln. 46-48).

7. Regarding claim 2, Figure 3 of Peterson shows a fluorescent lamp holder (12) located between the auxiliary tubes, the fluorescent lamp holder having lighting means (14) mounted therein for lighting up and fixing members (56) formed at both ends thereof for fixing the connection terminals of the lamp body.

8. Regarding claim 3, Figure 3 of Peterson shows the fluorescent lamp holder having wing fragments (54) extending outwardly from both side ends thereof for protecting the auxiliary tubes of the lamp body.

### ***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Foster (US 5,209,674) discloses an end-to-end neon tube connector. Devorris (US 5,725,299) discloses an encapsulated charged gas light apparatus.
